

# MUCK SPREADERS

## AB

3.1 - 11.5 m<sup>3</sup>

You can count on an Abbey machine being strong – after 70 years in business they know their stuff. Abbey spreaders have increased chassis support for maximum support of the drum. A splined shaft gives maximum strength for the heavy-duty chain drive. And the rotor has heavy duty bearings.

**Robust reinforced drum**

**Hydraulically operated door**

**Heavy duty rotor with chains and flails**

**Heavy duty chassis**

**Ideal loading height**

**Starter flails**

### Features:

- Low maintenance
- Will spread solids or liquids
- Easy to operate
- Heavy duty rotor and chans system
- Cantilever lid
- Heavy duty drive chain drive
- No jamming of stones or material under rotor as all material is discharged over the top
- Side discharge
- Hydraulic opening side door
- Starter flails
- Wide angle driveshaft
- Winding jack stand
- 6" rear outlet

### OPTIONS:

- Hydraulic brakes
- Wheel upgrades
- Mud guards
