

BALE SHEAR

FARMGARD

BALE SHEAR

BS1000

Designed to revolutionize your bale handling operations, Abbey Bale Shears are engineered with cutting-edge technology to streamline the process of splitting round bales while retaining plastic.

Floating clamp design

Maintains even pressure across the bale, adapting to its shape for a secure grip and a clean, consistent cut every time.

Hydraulic sequencing valve

Ensures smooth, controlled operation by engaging the clamp before the blade for safe, efficient cutting. It automatically manages the clamp's grip and release sequence, allowing the operator to run the system on a single service while everything works in the correct order.

Heavy-Duty Tines & Cutting Edge

Built tough with high-grade Irish steel, the reinforced tines and heavy-duty cutting edge deliver exceptional strength and durability, providing reliable, consistent performance in demanding farm conditions.

Features:

- Splits round bales while retaining plastic & net
- Improved operator efficiency & safety
- Reduces feeding time
- Euro brackets supplied as standard for easy compatibility and integration with your existing tractor and equipment
- Cuts silage, hay & straw with precision
- Double acting hydraulic system
- Ideal for splitting bales and feeding into a diet feeder or in front of feed barriers
